

# Infinity-Box Online Service, 2-Step Verification

What is 2-Step Verification.....1  
 How to enable 2-Step Verification.....1  
 How to sign in with 2-Step Verification.....2

## What is 2-Step Verification

With 2-Step Verification you can add an additional layer of security to the sign-in process and protect your account from online hijacking. In addition to ordinary Username and Password you can use your Dongle or Box as a special Authorization Key (**Token**) for additional authentication. Any Infinity-Box Box or Dongle can be used as a **Token**, f.e. Main Infinity-Box, Infinity-Box [BEST] Dongle, Infinity-Box CDMA-Tool Dongle.

**Note:** If you do not have an Infinity-Box product you can order special cheap **Infinity-Token Dongle** from your reseller.

## How to enable 2-Step Verification

1. Sign in to your Infinity Online Service account with your Username and Password

2. Go to "Settings" menu, you will see "2-Step Verification" is "Off"

3. Click to "Off" to change 2-Step Verification to "On"
