Field Type	Name	Description	Field Op
<input type="text" value="Text"/>	<input type="text" value=""/> *	<input type="text"/>	<input type="text"/>
<input type="text" value="Text"/>	<input type="text" value="LOGIN"/> *	<input type="text" value="Enter (10 Digits) Infinity !"/>	<input type="text"/>
<input type="button" value="+More Mapping"/>			

+More Mapping: Different names known in other fusion or other scripts e.g. SERIAL_NUMBER, SRNO, Serial No etc

[Change Default field settings.](#)

Configure SL3 unlock job

1. Login to DHRU Fusion Admin and create API connection:

- Menu **Settings** -> **API Settings**
- Select unused API Server Name and click to **Activate** button
- Select Service name like **Other Fusion 1 [File BETA]** or **Other Fusion site with file service api**
- Click to **Edit & Synchronize**
- Enter Service Configuration values: **NAME, API KEY, USERNAME, API URL**
- Click to **"Start Synchronize"** button to get list of services

```
Updating services list
=====
Group :: IOS
  Tool :: SL3 unlock code - 14
Successfully synchronize
```

2. Add new Service

- Add new Service
- Click to API Connection
 CONNECT API: Select **IOS**
 API SERVICES: Select required product name
 KEY SETTING: --- None ---
- Click to **Save** button

3. To enable API automation features to run, make sure you set up a cron job:

```
/usr/bin/wget --spider -t 1 "http://your-site.com/includes/cron.php?
action=fusionfile1&service=file"
```
