# Unsigned drivers, Windows 8/8.1

To install unsigned Smart-Card drivers under Windows 8/8.1 you can disable drivers signature verification.

"Windows encountered a problem installing the driver software for your device. Windows found driver software for your device but encountered an error while attempting to install it. The hash for the file is not present in the specified catalog file. The file is likely corrupt or the victim of tampering."

į	DUpdate Driver Software - USB Serial Port
	Windows encountered a problem installing the driver software for your device
	Windows found driver software for your device but encountered an error while attempting to install it.
	Crystalfontz CFA635-USB
	The hash for the file is not present in the specified catalog file. The file is likely corrupt or the victim of tampering.
	If you know the manufacturer of your device, you can visit its website and check the support section for driver software.
